

The Average Warehouse Worker Wastes 7 Weeks A Year With Unnecessary Motion

Eliminate it with Mobile Powered Workstations.

What is wasted motion costing your warehouse?

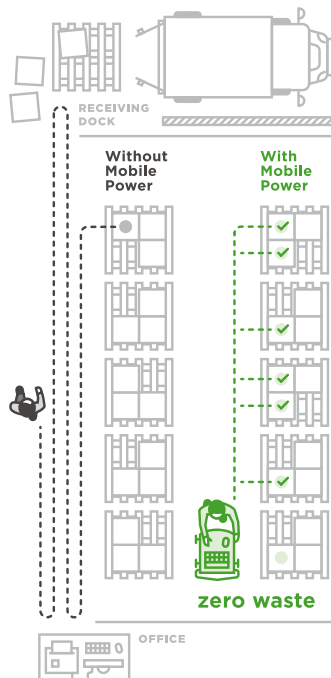

"They are the best thing I have ever placed into a warehouse for productivity, flexibility, and function!!!"

– Joe H., Parts Logistics Mgr., Mercedes-Benz

"The portable power enables us to take our workstations to any area within our facility while increasing work flow, productivity and giving us greater flexibility in our process. It's extremely easy to use and powers anything we plug into it"

– Team at Amazon

What Is Wasted Motion Costing Your Warehouse?

You may not see it, but little by little, wasted time and effort walking to and from stationery workstations is adding up.

Did you know that the average warehouse worker wastes about **8 minutes per hour** needlessly walking?

You may be shocked to learn how much those "few" minutes are actually costing you.
